➔ **Nextel Developer Program** - Learn about developing applications for use on the Nextel network

Nextel's Developer Program is a community of developers interested in creating software applications for the Nextel network and data-capable phones. The Nextel Developer website, [developer.nextel.com](http://developer.nextel.com), is the primary tool for sharing information about Nextel's technology and interfaces with developers. The site provides free access to program information, technical documentation, and technical support resources designed to facilitate the development process
